

SF₆ GAS REFILLING DEVICE

This handy device allows filling of electrical equipment with SF₆ gas directly from the cylinder by using its available pressure. The cylinders output pressure can be reduced to the desired filling pressure by the integrated pressure reducer. There are also two built-in gauges: a high pressure which shows the actual cylinder pressure and low pressure that displays the output pressure from the pressure reducer. The 3-393-R006 can be connected via the included DN8 or DN20 female self-sealing couplings.

- 5m (16') supply hose
- Pressure reducer with standard US connection (CGA590)
- DILO DN8 and DN20 self-sealing couplings
- Gauge indication in PSIG
- Two operating manuals in the following languages:
 - ☐ English
 - ☐ French
 - ☐ German

Technical Data:

Dimensions:	15" W x 4.9" H x 18.7" D (381 x 124 x 475 mm)
Weight:	16.5 lbs (7.5 kg)

*Accessories available upon request.
