

## ANNUAL SCALE CALIBRATION PROGRAM

With regulatory agencies, such as the USEPA, MassDEP, and CARB requiring companies to track and report SF<sub>6</sub> usage, accuracy and ease of calibration are more important than ever.

### Standard Procedures:

- Full functional test and comprehensive inspection of the device
- Calibration Certificate is provided upon completion of each service event
- Test Weight NIST Certificates, Legal-for-Trade, will be provided

### Models Covered\*:

K091 Series
D-230 Series
3-001-R021

### Notes:

Calibration to be performed at DILO's service center.
Transport of scale to & from DILO facility not included.
Includes a maximum of one (1) calibration or calibration verification per year.

\*Any additional repair cost will be quoted separately upon inspection at DILO's service center.

\* Program does not include repairs of parts due to damages which may result from abuse, misuse, misapplication, accidents, or because of service or modification by anyone other than authorized DILO representative. Any additional repair cost will be quoted separately upon inspection at DILO Company Inc. analyzer service facility.
